MUHAMMAD TALHA

Full Stack Developer & AI Automation Engineer

Lahore, Pakistan | talhazahid710@gmail.com | +92 316 4247480 | Linkedin | Portfolio | Github

PROFESSIONAL SUMMARY

Full Stack Developer and AI Automation Engineer with hands-on experience delivering production web platforms, mobile applications, and AI-driven workflow automations for clients across healthcare, finance, and public-sector projects. Skilled in building full-stack solutions with **React.js, Node.js, TypeScript, and Flutter**, and in designing custom automation pipelines with **n8n, Make.com, and LLM APIs (OpenAI, Groq)** that integrate CRMs, cloud workspaces, and messaging platforms to eliminate manual work. Comfortable owning a project end-to-end — from server setup, database design, and version control through UI implementation and deployment.

EXPERIENCE

Syncognix

Team Lead & Full Stack Developer — **September 2026 – Present**

- **Lead and mentor a development team** by planning sprints, assigning tasks, conducting code reviews, and ensuring timely, high-quality delivery of client projects.
- **Architect and build full-stack web applications** using React.js, TypeScript, Node.js, and relational/NoSQL databases, owning technical decisions from requirement analysis through deployment.
- **Coordinate with clients and stakeholders** to translate business requirements into technical solutions, while maintaining Git-based workflows and development best practices across the team.

Ingenious Concepts

Lahore, Punjab, Pakistan · On-site

Full Stack Developer · Full-time — **January 2026 – August 2026**

- **Develop and deliver full-stack web applications** using React.js, JavaScript, TypeScript, MySQL, and modern web technologies, handling both responsive front-end interfaces and robust back-end logic, APIs, database integration, authentication, and CRUD functionality based on client requirements.
- **Build, deploy, and maintain web solutions** across cPanel hosting environments, with hands-on experience integrating Firebase and Supabase for authentication, real-time data, and backend services. Also customize WordPress themes and plugins while implementing on-page SEO and performance best practices.
- **Manage end-to-end development and version control** using Git/GitHub, from requirement analysis and UI implementation to backend development, database management, testing, deployment, and maintenance. Delivered projects including **Pawfect, Natural Language, Election Campaign System, Novious Global, Sehat Makaan, PCG, Sygnifin, Ingenious Concepts**, along with other academic and personal projects such as **SafarSync**, an AI-powered travel and tourism platform featuring bookings, Google Maps navigation, group location tracking, AI tour planning, and SOS/ICE functionality.

AI Automation & Web Development Intern · Internship — **October 2025 – January 2026**

- Developed backend applications and RESTful APIs using **Python (Flask)** and **Node.js**, following modular architecture and clean coding practices.
- Built and integrated REST APIs with frontend applications while implementing authentication, validation, and error handling.
- Designed and managed relational databases using **PostgreSQL** and **MySQL**, optimizing queries and ensuring data integrity.
- Implemented CRUD operations, database models, and API endpoints for scalable web applications.
- Utilized **Git** for version control, feature branching, code reviews, and collaborative software development.
- Containerized backend applications using **Docker** to ensure consistent development and deployment environments.
- Built AI-powered automation workflows integrating **OpenAI APIs**, third-party services, and business applications using **Python**, **n8n**, and **Make.com**.
- Developed an AI-powered Code Debugger using **Flask**, **Scikit-learn**, **Pandas**, **NumPy**, **OCR (Tesseract)**, and **Pillow** for automated error classification and debugging assistance.
- Performed API testing, debugging, and integration validation using **Postman**, ensuring reliable communication between services.
- Familiar with asynchronous programming concepts, software testing, virtual environments, and writing maintainable, reusable Python code.
- Strong understanding of object-oriented programming, exception handling, type hints, SQL, RESTful services, and backend application architecture.
- production-ready AI solutions across projects including ECS, Novious Global, Sehat Makaan, PCG, and Sygnifin.

Full Stack Developer (Intern) — DirectFN

April 2025 – September 2025

- Collaborated within a 5-person engineering team to build a Stocks Trading App, an Accounting System, and an Inventory System from the ground up.
- Developed full-stack features using **React** for the frontend and **Node.js** for the backend, with SQLYog for database design and management.
- Containerized services with **Docker** to ensure consistent development and deployment environments across the team.

Web Developer (Intern) — Lemon Studios

April **2023** – December **2023**

- Built full-stack features using the **MERN stack** (MongoDB, Express, React, Node.js) under senior developer supervision.
- Developed cross-platform mobile functionality using **Flutter** and **React Native**.

EDUCATION

Bachelor of Science (BS), Computer Science — ***Riphah International University, Lahore*** **October 2022 – July 2026**

SKILLS

Languages & Frameworks	Python, JavaScript, SQL, React.js, Next.js, Flutter, React Native, WordPress, Type Script C#, .NET
Backend & Database	Node.js, MySQL, SQLYog, Firebase, Supabase, MongoDB
AI & Automation	n8n, Make.com, OpenAI & Groq APIs, LLM integration, prompt engineering, REST APIs/webhooks
Tools & Practices	Docker, CI/CD, Git & version control, cPanel, Figma, on-page SEO, AWS

SELECTED PROJECTS

Pawfect, Natural Language, Election Campaign System, Novious Global, Sehat Makaan, PCG, Sygnifin — Client websites and platforms built and customized at Ingenious Concepts (React, WordPress, custom themes/plugins).

Stocks Trading App & Accounting/Inventory Systems (DirectFN) — Full-stack apps built with React, Node.js, SQLYog, and Docker.

SMAC Mobile App & Website (ZNZ Communications) — Flutter-based mobile application and Mern Stack based web app
